

Description

A new 100% natural gun lube that is an effective alternative to petroleum and synthetic based oils. Field users have validated significant benefits in a wide range of shooting applications, including sport shooting, hunting, SWAT operations, and military uses; even in air guns and paintball. The friction coefficient of EnviroShot is 39 - this is nearly 10 times lower than petroleum based oils. In addition it has exceptionally low dust adherence, excellent water resistance and requires less oil coverage and, thus, goes further. One major advantage EnviroShot™ has over petroleum is that it has a "game friendly odor." Which means you can use EnviroShot™ in the field with peace of mind knowing that game are not repelled by the scent. EnviroShot is non-toxic and safe to handle, use and store around children and pets and it will not pollute the environment! EnviroShot is Made in the USA from components grown by American family farmers.

Applications

EnviroShot™ is ideal for:

- Hunting rifles and shotguns
- Cleaning and protecting any firearm
- Shooting ranges, gun shops
- Compatible with black powder (muzzleloaders) firearms

Features & Selling Points

- 100% Natural & Biodegradable
- Superior performance
